# How to Complete an ACC/NCDR Harvest/Submission for the LAAO Registry

1. From the CardiacCare homepage, navigate to the **Harvest/Export** tab, then select **ACC/NCDR Harvest.**

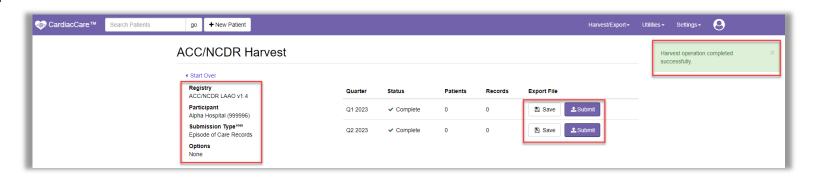

2. Select your **Registry, Participant, Year**, and **Quarter. You can choose the Submission Type,** and choose any of the **Options** to include in your harvest (the **Options** section is optional**). Once you have the necessary information in all the mandatory fields, you can select **Run Harvest.**

3. After you select **Run Harvest,** you will see the status and all the fields you selected previously. A little green box will pop up notifying you that the **Harvest operation was completed successfully.** You can now **Save** the file to your computer, and/or submit it directly to the NCDR by selecting **Submit.**

4. After you submit the file to the NCDR, you can check the status of your submission by hovering over Harvest/Export, then selecting NCDR Submission.

If your submission was a success, you will see a little green checkmark to the left, and **Success** to the very right under **Assessment Status**. Each submission also shows the **Submission Date**, who it was **Submitted By**, the **Participant**, and **Registry**. If your registry was a failure, it will show everything listed above, accept, it will say **Failure** under **Assessment Status**. Do not be alarmed if you do not see your submission right away. It can take some time for the NCDR to process the submission.
