

Adding a Patient to ImpairmentCare

Select 'Add Patient' from the top menu bar

The screenshot shows the ImpairmentCare application interface. The top navigation bar includes the following items: ImpairmentCare, Search Patients, Add Patient (highlighted in yellow), Chapter, Calculator, Mark Completed, Settings, and Jason Nill. On the left side, there is a search section titled "Search by" with a dropdown menu set to "Name", a search text input field, and a "Search" button. The main content area displays a table titled "Showing 4 patients with recently created evaluations". The table has three columns: Last Name, First Name, and Date of Birth. The data rows are as follows:

Last Name	First Name	Date of Birth
Smith	Ben	2/18/1972
Nill	Dona	1/4/1955
Nill	Jason	5/9/1973
Cross	Jennifer	1/20/1971

The bottom of the page shows the URL <https://next.impairmentcare.app/patient/add> and the copyright notice © Cedaron 2023-2024.

Enter the minimum patient Demographics, Injury & Evaluation information then click Save.

ImpairmentCare opens the appropriate chapter to begin a diagnosis.

Navigate to additional chapter as needed.

The screenshot shows a web browser window with the URL <https://next.impairmentcare.app/patient/86/visit/68/admission/72/edition/3/chapter/3/1/amputation>. The application header includes navigation options: ImpairmentCare, Search Patients, Add Patient, Chapter (highlighted in yellow with an arrow), Calculator, Mark Completed, Settings, and Jason Nill. The main content area is titled "Patient: Tom Green" and features a "< Chart" button. Below the title is a horizontal menu with tabs for "Amputation", "Thumb", "Index", "Middle", "Ring", "Little", "Wrist", "Elbow", "Shoulder", "Strength", "Vascular", and "Peripheral". The "Amputation" tab is active, displaying a central instruction panel. At the top of this panel are radio buttons for "Hands" (selected) and "Arms". Below these are "Reset Left" and "Reset Right" buttons. The main text reads: "Select the body part which has been amputated. Use a right click of the mouse for a partial amputation and left click for a full amputation. For partial amputations, the section immediately below the position of the arrow will be amputated." Below this text are two sub-headers: "Right-click or drag from a background region for partial amputation" and "Left-click for full amputation". On either side of the text are vertical grey bars containing skeletal diagrams of a hand and a foot, respectively, for selection.
